REVISIONS MADE

INCREASE SIZE OF "SCHOOL OF PHARMACY..." VINYL

The City of Omaha has recently incorporated the National Electric Code into its City Code. A section of that code requires the use of a new type of transformer called UL 2161 in ALL NEON SIGNS. Because of the extreme sensitivity of the 2161 transformers to even the slightest variations in voltage, it is highly recommended that a dedicated circuit including ground & neutral wire be installed for each sign to ensure the performance of these transformers. No other outlets or lights should share this circuit. The failure of the customer to provide a dedicated circuit for each neon sign will mean that Neon Products Co., Inc., can not be responsible for outages of the sign caused by changes in voltage.
