Re: Recall Program for Certain Dayton Dehumidifiers

Dear Grainger Customer,

We understand that you may have purchased from W.W. Grainger, Inc. one or more of the following Dayton portable dehumidifiers manufactured before December 2012 by GD Midea Air Conditioning Equipment, Ltd.

<u>Grainger SKU #</u>	<u>Dayton Model #</u>
1DGX4	1DGX4
1DGX5	1DGX5 OR 1DGX5A
1DGX6	1DGX6
5EAJ7	5EAJ7
5EAJ8	5EAJ8
5EAJ9	5EAJ9

As the manufacturer of these dehumidifiers, we write to bring an important issue to your attention.

Midea has received a small number of claims indicating that some Midea dehumidifiers manufactured prior to December 2012 have been involved in household fire or smoking incidents. No injuries to any person have been reported. **Please immediately turn off and unplug the dehumidifier.**

As part of our dedication to product quality and safety, and to promote customer satisfaction, Midea is, in cooperation with the U.S. Consumer Product Safety Commission (CPSC), offering an incentive program to encourage users of these older Midea dehumidifiers to take them out of service. Midea is required by the CPSC to describe this program as a recall.

The remedy options are as follows:

<u>Age of Dehumidifier</u>	<u>Remedy Option</u>
Manufactured on or before October 1, 2008	Partial refund
Manufactured after October 1, 2008	Option of partial refund or replacement unit

The partial refund figures are based on a pre-determined schedule.

To determine if your dehumidifier is affected, please log into Midea's website at <https://www.recallrtr.com/dehumidifier> and follow the prompts, which will let you know if your unit is affected by this recall. If your unit is not affected, the website will tell you. You will need to provide the Brand, Model and Serial Number listed on your unit. Please see the representative images below to help identify the product and required information.

The phone number for the recall program is 800-600-3055, and is staffed from 7 a.m. to 6 p.m. Central Time Monday through Friday. Please do not contact either Grainger or the retailer from whom you purchased the product; they will direct you to the Midea recall website.

Your safety and satisfaction are our top priority. We appreciate your cooperation and understanding.

Sincerely,

Product Recall Administrator
